Building Blocks for a Cancún Package
Presentation by CAN International

[Tianjin, China] CAN International will propose and detail a package of achievable and fair decisions for countries to adopt at the upcoming UNFCCC talks in Cancún, Mexico, on Wednesday, October 6, 18:00 – 19:30, in room Yinchuan, Meijing Conference Centre, Tianjin, China.

Parties to the talks currently underway in Tianjin, China, are increasingly calling for adoption of a “balanced package” in Cancún. The Building Blocks proposal by CAN International details the components that could plug into such a feasible yet fair package, one that would provide the foundation for final deal a year later in South Africa. The Cancún Building Blocks proposal also provides a yardstick for measuring the fairness and environmental integrity of any deal reached in Cancún.

The presentation will include formal response by respondents from several country delegations.

CAN panel:

- David Turnbull, CAN-International
- Wendel Trio, Greenpeace International
- Sandra Guzman, Centro Mexicano de Derecho Ambiental (CEMDA)
- Raju Pandit Chhetri, United Mission to Nepal (UMN)
- Niranjali Amerasinghe, Center for International Environmental Law (CIEL)

What: Presentation of a fair, balanced and achievable package for Cancún

Where: Room Yinchuan, Meijing Conference Centre, Tianjin

When: 18:00 – 19:30, Wednesday, Oct. 6
