MESSAGE FROM THE DIRECTOR

Several colleagues were surprised that I applied for the position of leading the biggest network working on climate change, especially at a time when there is no serious political will to do anything on climate change, yet an increasing number of organizations and institutions are reducing their resources to work on the issue.

Governments have little political will to increase their ambition to fight climate change, NGOs and donors have substantially reduced their resources directed towards the issue, the fossil fuel industry is still as strong as ever, and so on. To my friends, leading CAN at this time was not a smart career move, since the ability of networks such as CAN to achieve substantial impact on the issue is heavily criticized.

Nevertheless, the only thing that is certain in scientific reality is we also need to peak emissions very soon in an equitable manner, otherwise we put life on the planet at great risk. The next 10 years will determine the fate of our civilization. If we lose the fight, future generations will not blame this country or that government, they will blame our whole generation. The failure will be the failure of all of us. Therefore, despite all the existing difficulties and the advice of many, taking this new position is part of my generational responsibility.

I fully believe that CAN, which is at the heart of the climate debate, is necessary to reach a successful solution to the climate disaster. Although we may be best known for mastering the art of coordinating and leading civil society policy work in the UNFCCC, CAN is unique in many other ways. First, we are the biggest and most widespread global network working on climate change. Second, we have national and regional networks that work in virtually every corner of the planet. Third, we have gained valuable skills in terms of civil society coordination and network development that are rare elsewhere. Fourth, the diversity of CAN members is also unique, since it contains various types of civil society organizations (development, faith-based, environmental, grassroots, international, legal, think tanks, etc.) and has the widest possible spectrum of opinions and positions on the different issues within the climate debate. Finally, CAN members have a strong commitment to the Network, are actively engaged in its work, and collaborate with one another in good faith.

The year 2012 has been a year of planning, and almost all climate networks and organizations, including CAN, have been thinking about what to do in the coming two to three years. It has been very interesting to explore the thinking of individuals and organizations from both inside and outside the Network throughout the year. At the strategic planning retreat in Bangkok, we developed new directions and achieved important breakthroughs. This work has identified three key roles for CAN. Firstly, CAN needs to continue doing what it does best:

Wael Hmaidan
Photo Credit: Leila Mead/IISD

coordinating civil society work around international processes relevant to climate change, especially the UNFCCC process. Secondly, CAN needs to complement this international work by coordinating campaign opportunities among its members on national and regional levels. Thirdly, CAN will upgrade its role as civil society convener, by becoming the builder of a more holistic climate movement on the international, regional, and national levels within and outside the Network and reaching out to other social and development movements.

With these new key roles and the three-year strategic plan, confidence in CAN is stronger than ever. Support and commitment to CAN's new directions have been coming from every side (members, donors and other stakeholders) and the Network has never been on more solid ground.

MESSAGE FROM THE BOARD CO-CHAIRS

The year 2012 was eventful for CAN. The CAN Board of Directors prioritized assisting the new leadership in the Secretariat while maintaining the sustainability on substantive and financial aspects of the Network. The Board hired Wael Hmaidan as the new CAN Director and facilitated CAN's activities by providing support on program and fundraising activities. It was heartening to see Wael taking over the responsibility with ease and demonstrated new thinking on regional node engagement in order to scale up our advocacy activities as the new phase of CAN policy work.

The CAN Charter, our Network's bylaws, was updated through regular consultations with regional nodes to ensure that we, as a global network, can manage complex issues related to governance through transparency and accountability.

With existing deadlock on international climate negotiations, the Board supported prioritizing advocacy work at the country-level by working with likeminded stakeholders. To materialize the thinking, the Board actively participated in designing the CAN Strategy for 2013–2015 that focuses on issues pertaining to sustainable development with climate aspects to be integrated in long run.

With so much foundational progress made last year, CAN can now focus on operationalizing its strategy for 2013–2015 through shared responsibilities within regional nodes. The

Capacity Building Program has identified human resources, in the form of LDP Fellows, that add capacity to regional node secretariats in developing countries and will ensure dedicated contribution from these nodes. With increased capacity and regular successes, CAN members have increased expectations from the Network. This demonstrates the increased trust of our members and supporters and we are hopeful that the 2013 Board will continue to turn new challenges into opportunities.

CAN BRAND RENEWAL

The Network moved to strengthen its global presence and harmonize its regional networks by updating CAN’s branding and logo. Initially developed by CAN Europe, but now in place across all of CAN’s communications channels, the new logo is a modern and fresh visual identity for the Network. The new branding reflects CAN’s values and work. The blue element of the logo reflects the climate or atmosphere, while the green circular movement stands for action. The two colors are encased in the shape of the globe, which represents the nature of the Network. The new logo can act as a tool, which will bring the CAN nodes closer together through a united visual identity. As such, CAN is encouraging regional nodes to adopt the logo to increase the effectiveness of the Network’s visual presence globally. In the coming year, CAN will be supporting regional nodes to make the transition to the new branding.

THIS IS CAN

If you are a supporter or member of an NGO that works on stopping climate change anywhere in the world, you are most likely a part of CAN. The Climate Action Network-International (CAN or CAN-International) is a network of over 850 Non-Governmental Organizations (NGOs) in over 90 countries working to promote government and individual action to limit human-induced climate change to ecologically sustainable levels. CAN members work to achieve these goals through information exchange and the coordinated development of NGO strategy on international, regional, and national climate issues.

MISSION

To support and empower civil society organizations to influence the design and development of an effective global strategy to reduce greenhouse gas emissions and ensure its implementation at international, national and local levels in the promotion of equity and sustainable development.

VISION

A world striving actively towards and achieving the protection of the global climate in a manner, which promotes equity and

social justice between peoples, sustainable development of all communities, and protection of the global environment.

CAN MEMBERS COME FROM CAN REGIONAL NETWORKS

Around the globe there are regional networks of NGOs working on climate change, known in CAN as "nodes," they come together as CAN-International.

MEMBER ORGANIZATIONS COME TOGETHER AS CAN

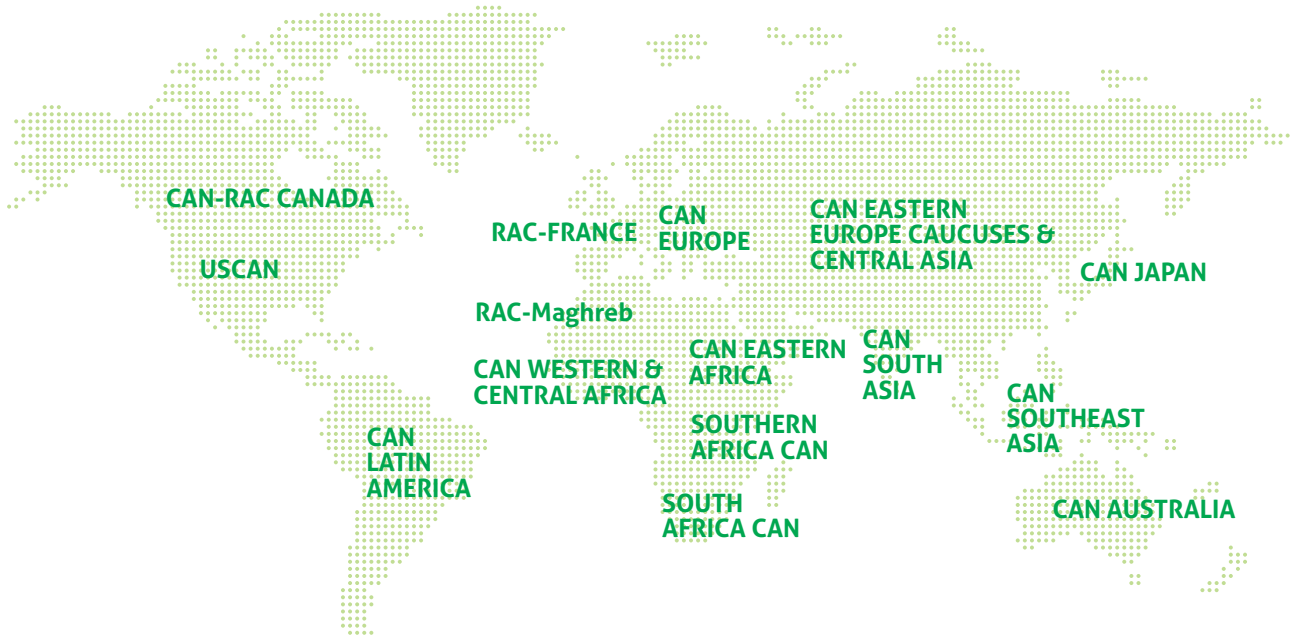

Member organizations all work on climate change, but come from different constituencies, which have diverse backgrounds and views, including: environmental, development, youth, faith, indigenous peoples, research, labor and trades, gender, farmers and local governments. Although it can be challenging to reach consensus, because of CAN's vast number of members, its geographical span and diversity in views, this allows CAN to speak as the voice of civil society in community, regional, national and international arenas.

See the complete list of 2012 members on pages 26–33.

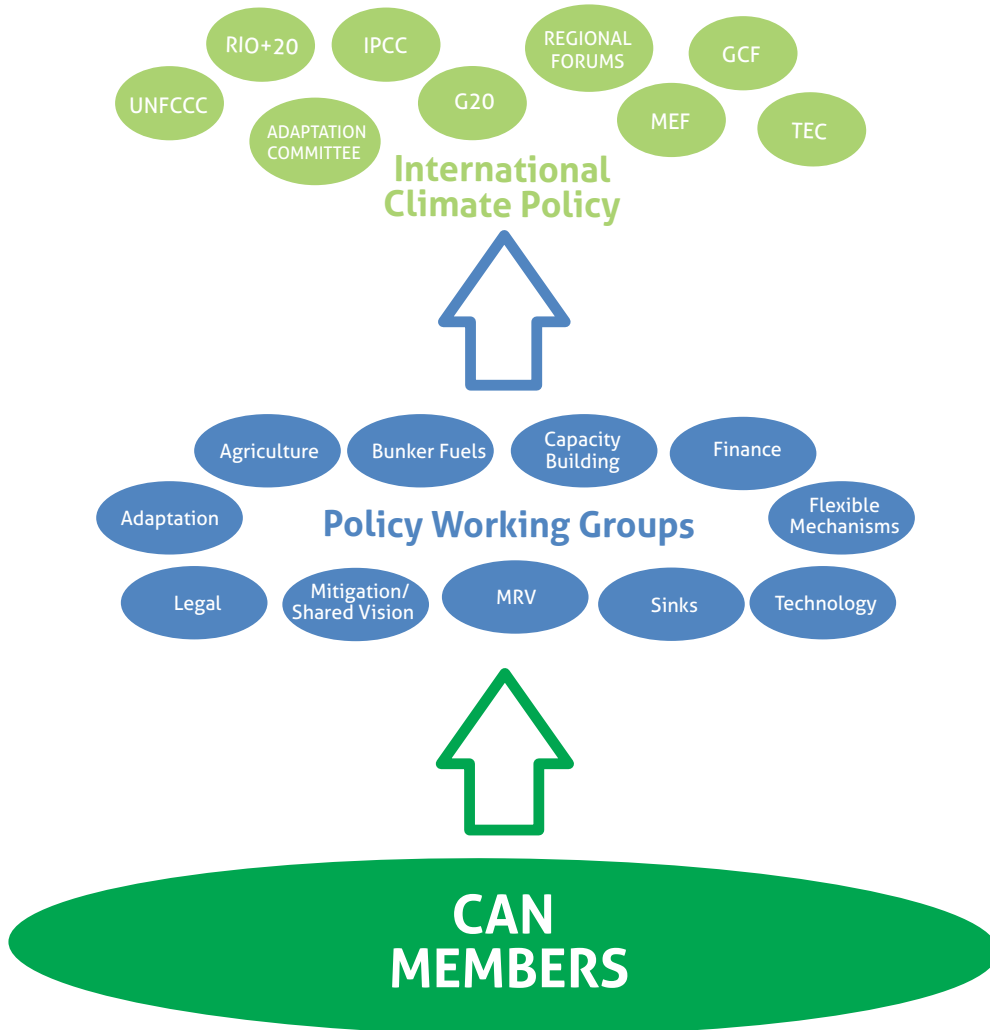

THEMATIC WORKING GROUPS

CAN members follow issues and coordinate advocacy and campaigns around these themes in working groups, which meet at international meetings and also virtually between sessions.

SHARING CAN'S MESSAGE

DOHA MILESTONES AND ACTIONS

CAN produced the Doha Milestones and Actions: how COP18/ CMP8 must increase short term ambition and establish a clear path to 2015, which laid-out CAN's expectations for outcomes from the UN climate talks in Doha, Qatar in December 2012. This document built on the previous three similar documents produced by CAN for the Copenhagen, Cancun and Durban climate conferences. The Doha Milestones and Actions encompassed input from CAN members from all regions and thematic working groups. It was used by CAN members as an advocacy tool and to highlight the urgent areas of agreement that were needed at the UN climate conference. The document was distributed to negotiators and other civil society groups. Beyond the full English version, summary versions of the Doha Milestones were translated into French, Mandarin, Spanish and Russian, which are all available on the CAN website.

ECO

CAN produced 29 issues of the ECO newsletter last year at three UN climate negotiation sessions, as well as nine issues of an abridged ECO at the Rio+20 UN Sustainable Development Conference.

ECO is distributed each morning of the climate negotiations to delegates and observers, and provides the 'pulse' of the negotiations, as well as CAN's position and views on progress. It outlines the key issues of the day ahead and provides the NGO perspective on what must occur for progress to be made on avoiding dangerous climate change. It is one of the first documents the majority of conference delegates read each morning and serves as an especially useful tool for small government delegations that can have difficulty following all the issues. In addition to the standard English versions, ECO was also translated into Spanish at the Bonn and Doha negotiations.

CAN Press Conference at COP18
Photo Credit: Issam Abdallah

In addition to the Spanish translation at the Doha session, it was also translated into French and Arabic. Past ECOs are available on the CAN website.

ECO GOES DIGITAL

With the assistance of CAN-Rac Canada, CAN International developed an iOS application for some portable electronic devices. As the Doha climate negotiations went Papersmart, CAN responded by increasing its online presence of the daily ECO publication through this app and other online promotions. CAN also insisted on providing negotiators from developing countries, often with limited resources for portable electronic devices, hard copies of ECO. In addition to launching this app, CAN promoted its online ECO newsletter email distribution service to almost triple the list's membership, now at almost 3,000 recipients.

FOSSIL OF THE DAY

CAN presented its Fossil of the Day awards at the Bonn, Bangkok and Doha climate negotiations. CAN members vote daily to present these sarcastic awards to countries judged to have done their "best" to block progress in the negotiations in the last days of talks. In addition, the newer tradition of awarding scarce "Rays of the Day" to highlight especially laudatory actions continued this year as well. The 2012 ceremonies in Doha were lead by members of IndyACT and concluded with the tradition of awarding the 2012 Colossal Fossil of the Year, presented to both New Zealand and Canada, for performing the most poorly at the Doha climate negotiations.

MEDIA ENGAGEMENT

CAN held press conferences in Bonn, Bangkok and Doha, which attracted reporters from major international wire services as well as local, national, and regional outlets. At the Doha COP 18, CAN held nine press conferences and was able to harness heightened interest from media for comment from CAN's Director, as the major climate negotiations for the year were

held in his home region, the Middle East, for the first time. Highlights included regular live interviews on both English and Arabic Al Jazeera channels, a documentary on CAN's work by the German television station WDR, as well as landing the front page of the CNN website with an opinion article. As well as shaping the general tone of media coverage coming out of COP18, CAN's media activities generated coverage in all major English language wire services, such as Reuters, AP, AFP and Bloomberg as well as in other many other outlets including CNN, Al Jazeera English and Arabic, The Telegraph (UK), BBC and the New York Times.

A communications coordinator was brought on to the Secretariat, which enabled further capitalization on this interest in CAN's work. This augers well for media relations going forward, especially as CAN expands its press outreach in relation to major international climate-related events.

The Doha Decisions

Today is the day to press the reset button. The planet is shouting warning signs at us but the Conference is sleep-walking off the cliff of climate disaster. A political deal was struck in Durban and all need to stand by it.

Ministers, while you bemoan the impending doom in high sounding high-level speeches and promise to do everything within your power to stop it, your negotiators dig in ever deeper in the back rooms of the QNCC.

The Doha deal ECO believes is still within reach would take immediate steps to improve the short-term ambition we urgently need. Your political ambitions need to be matched by targets and pledges more ambitious than the ones currently on offer.

Speaking of pledges: whatever happened to the ambition of the Gulf countries to become climate leaders? What or who is holding them back? Was this the cause of the commotion at the Qatar Airways desk yesterday?

Clearly, much hard work lies ahead to close the growing gigatonne gap. This must start right away with an ambition 'ratchet' mechanism (KP) and plan of work with specific milestones (ADP).

Which brings us to the most uncooperative track of all, the LCA. With 53 (!) outstanding issues, this feels like the playroom after a toddler's birthday party. Is that what you mean by Party-driven process? Where is the leadership, who can take the reins? Surely,

with good will, the spirit of compromise and some elbow grease the real crunch issues can be dealt with by ministers. And the outstanding ones can be moved forward to a suitable home before the sun sets here at Doha.

Now – no more delays, no more excuses – you must adopt strong amendments to the Kyoto Protocol that strengthen its environmental integrity by limiting hot air. To those that abandon Kyoto in search of a warmer climate: shame on you.

There are some encouraging signals that progress was made on the workplan needed to keep us on track for a fair, ambitious and binding Paris Agreement in 2015. We must of course learn from past mistakes (pssst, Copenhagen!) This workplan needs clear deadlines and milestones. We strongly recommend delivering a consolidation text by the end of next year and negotiating text at COP 20 at the latest.

Also essential to a Doha deal are concrete inclusive steps to be agreed on implementing the 'fairness' principles of the Convention in our new 2015 deal. We need clarity on what 'equity' means for you and what it means for me? If even the U.S. can learn to talk about it, so can we all. But talk is cheap and these 'discussions' need to inform negotiations starting in 2013.

Announcements on finance are awaited from those countries that have yet to make theirs. But in order for

developing countries to have confidence that the \$100 billion per year commitment will be kept by 2020, the LCA must close with a clear collective commitment that public finance will increase above Fast Start levels in 2013, and amount to at least \$60 billion in new and additional public finance by 2015. To do otherwise is to leave the poorest communities without any assurance that they will be supported to cope with climate impacts.

Looking back in 2015 we might find the real story of the Doha climate talks was not that yet another compromise deal was struck -- a tiny step forward when step change was needed. The Doha deal must start to pave the way for the most vulnerable, the victims of climate change whose faces we saw on Al Jazeera, who are facing loss and damage this very day in their communities and cultures. You must agree today to set up and pilot an international loss and damage mechanism.

Doha may still be remembered as the place where you rediscovered your will to cooperate. Just maybe. Much like you did to save the banking sector in 2009. The planetary crisis looming over us dwarfs that finance crisis.

Ministers, delegates, today we are in your hands. You are playing for the whole planet.

If you say to me the words 'Climate Action Network International' the thoughts that come to my mind are: unity of professionals, inspired people and friends from all over the world, the main and strongest force to move climate negotiations towards solving the problem of climate change, information sharing, support, encouraging, and respect."

Khrystyna Rudnytska
ORG, Ukraine

SOCIAL MEDIA

The CAN Facebook and the Twitter pages offer the ability for CAN to connect with member organizations, climate activists and general social media users from around the world by sharing the Network's work and sharing up-to-date information during climate events. The work of members from Canada, China, Eastern Europe, Caucasus and Central Asia, Europe, Japan, Latin America and the US was featured on a weekly basis in the CAN Regional Spotlight series.

The CAN Facebook page more than doubled its followers in 2012. CAN encouraged followers to voice their opinion in the climate action dialogue through liking, commenting on and sharing CAN posts, as well as by posting their own news on the page.

Not only has CAN'S Twitter account been a great space to share more about member initiatives and global climate news, but CAN has also turned to this platform as a main means of communicating news and updates during climate events. With over 1,800 followers, CAN's Twitter audience only continues to grow.

ENGO FOCAL POINT DUTIES

The CAN Secretariat, through its Director and Program Coordinator, has acted as a focal point, or liaison, to the UNFCCC on behalf of the Environmental Non-Governmental Organizations (ENGOs) present at the international climate negotiations. This past year saw changes to the way civil society interacts with the climate negotiations, both formally and informally. Some progress was made in allowing for greater flexibility to give formal interventions at the negotiations, the ability to gain access to Informal meetings, improving meeting logistics, increasing accessibility of NGO submissions, and ensuring NGO access to workshops and technical meetings. CAN Secretariat provided leadership in these negotiations with the UNFCCC Secretariat and the other constituency focal points.

DEVELOPING CAN'S PRIORITIES FOR FUTURE CAMPAIGNS

CAN members worked together to identify a 2013–2015 strategic plan which extends beyond working effectively within the UNFCCC towards shaping regional and national policy through CAN's coordinated political efforts as well as engaging in key moments such as the release of the IPCC's review of climate science in 2013 and 2014. The development of this plan is a key part of a Network-wide harmonization and reflects an increasing number of member requests that CAN make efforts to shape national and regional policy. CAN member engagement in this process included: Network-wide calls, the commissioning of thought pieces on the 2015 deal and the geopolitics relevant for climate change, a survey of CAN members on key issues, groups work to develop specific elements of the strategy and three in-person strategic planning meetings.

The first in-person meeting took place over one day at the Bonn UNFCCC session. Forty-two CAN members then participated in a two day retreat in Bangkok in September where the Network's vision for 2015 was defined and the current political landscape was analyzed in terms of our zones of influence. Participants then mapped out some of the key moments over the next three years for CAN engagement. Real progress was made on the strategies in this session and the two days dedicated to their development at the COP18 in Doha.

The draft CAN 2013–2015 Strategy includes 3 main elements:

- + Key Objective 1: Achieve a Fair, Ambitious and legally Binding (FAB) deal in 2015.
With supporting strategies of building a leaders alliance, developing a compelling narrative on the need for a 2 degree, science-based, equitable global deal, shifting equity to be a driver of ambition and ensuring adequate public finance is mobilized. Ensuring the development of post-2015 sustainable development goals is complementary to a 2015 FAB deal in the UNFCCC.
- + Key Objective 2: Shift from business-as-usual to a race to a prosperous green future, illustrating that low carbon development is not only possible, but beneficial.
Supported by strategies to champion low-carbon development strategies nationally, in an inter-connected and synergistic way, coordinate work on targeting corporations and shifting private investment as well as shifting fossil fuel subsidies/public investment.
- + Key Objective 3: Build global, national and local momentum for action on climate change through empowered citizens demanding more from their governments.
This has two elements — firstly building a strong unified climate movement with a common narrative for environment and development, and secondly increasing general citizens voices calling for urgent action on climate change with coherent and coordinated messages to drive policy change.

CAN members coordinate daily at COP18

INTERNATIONAL CLIMATE POLICY

GENERAL COORDINATION SERVICES

The CAN Secretariat brings together CAN members to develop policy positions and to coordinate strategic advocacy. This coordination service takes place through online channels and in-person meetings, often in conjunction with international or regional climate meetings.

Last year, CAN continued hosting monthly conference calls for its policy working groups and weekly calls for the Political Coordination Group, a focused and representative group of actively engaged CAN members. Information sharing and strategic discussions also took place over CAN's 20+ email lists. The CAN Secretariat solicited updates from all thematic working groups and regional networks to compile the quarterly CAN newsletter. This newsletter is distributed to members prior to international climate negotiation sessions and highlights policy developments, opportunities for progress and strategic advocacy to meet objectives. Finally, the CAN website was updated to make information access easier for members and up-to-date documents were posted daily during negotiation sessions. Members can also follow CAN on social media accounts and exchange information on these forums.

Prior to each international climate negotiation session, the CAN Secretariat prepared a comprehensive logistics guide to inform members of CAN activities at the session and organized capacity building and strategy sessions for members immediately before negotiations began, as well as the strategic planning meetings in conjunction with each session. During the sessions, two daily meetings were held for members to track progress and develop strategic advocacy plans. After international negotiations, CAN ensured that the Network was unified in its analysis and future plans.

RIO+20 — UN CONFERENCE ON SUSTAINABLE DEVELOPMENT

CAN campaigned to ensure that climate change-related issues were mainstream in the Rio+20 conference and the processes that emerged from that summit. During the July Rio+20 conference, CAN coordinated the climate change work of its members and partners. The work was focused around pushing text from a joint position paper that CAN coordinated beginning in 2011, and updated in 2012. CAN's efforts in the Rio+20 conference included: organizing daily Fossil of the Day awards for countries who performed badly on issues relevant to climate change, producing the daily ECO Corner — one-pager version of CAN's ECO newsletter reviewing the negotiation on climate change relevant issues published within the daily newsletter Outreach — and lobbying governments to ensure that climate change related issues were negotiated inline with the CAN position paper. As recognition of CAN's engagement in the process, CAN's Director was selected to present the statement on behalf of all NGOs during the opening ceremony of the summit, as well as represent NGOs at a heads-of-state roundtable discussion.

Bringing Southern and Northern voices together in action on climate change is to me the key value of CAN. Such a common platform is remarkable on the scene of international negotiations. The challenge now is to mobilize for stronger campaigning for domestic climate action at the national level and to develop a global movement. We need to further develop our capacity both in the North and the South.”

Peter With
CARE Denmark, Denmark

One key post-Rio process that CAN focused its work on in 2012 was the process to formulate the Sustainable Development Goals (SDGs), which need to be agreed in 2015. These SDGs should be combined with the new Millennium Development Goals (MDGs) after the current MDGs reach their expiry in 2015. Both the post-2015 MDGs and SDGs will become the guiding beacon for the UN development agenda. The first MDGs process failed to incorporate climate change, therefore, CAN has put sincere efforts to ensure that climate change is a focus on the development of the new goals for post-2015. This is being accomplished through bringing together both the environmental and developmental movements. Environmental and developmental movements are tightly linked and must work more closely together, as the world will not be able to eliminate poverty if climate change continues to increasingly impact poor communities.

Following the Rio+20 Summit, CAN partnered with Beyond 2015, a coalition of primarily development NGOs, to assist in the creation of joint position papers to be submitted on the Environmental Sustainability and Energy Thematic Consultations to the United Nations. CAN is also co-organizing a conference on the post-2015 developmental agenda that will take place in early 2013 with other environmental and development networks, including: GCCA, CIVICUS, Beyond 2015 and GCAP.

CAN was also designated as a lead civil society organizations in the Steering Group Committee for the Environmental Sustainability Thematic Consultation to the UN on the SDGs. The main aspect of this position has been to ensure that civil society organizations have adequate voice and participation in the process.

The 2015 deadlines present a challenge for both the UNFCCC and the post-2015 MDGs/SDGs processes. The year 2015 is the end of the current MDGs and the UNFCCC deadline to create a 2015 global climate deal. CAN will work to ensure that civil society inputs into the two key summits in 2015 are coordinated and the outcomes are synergistic — magnifying positive climate change action, and broader social goals.

UNITED NATIONS CLIMATE NEGOTIATIONS

Bonn

The Bonn meeting started with some negative negotiating tactics used by parties to stall negotiations in one area (the ADP), in order to get progress in another (the LCA and KP). CAN worked to highlight this negativity — and importantly the underlying dynamic of a lack of commitments from developed countries that was its root cause. Despite a negative start, the Bonn intersessional ended by successfully making progress to move forward the LCA and KP negotiations, as well as the ADP. This was, to some degree, due to the work of CAN.

The Bonn session saw CAN give a Fossil of the Day to China for the first time (the week in review fossil went to China, Canada and the USA). The fossil was given for negative negotiating tactics, and it seemed as though the criticism was taken on board by China who substantially changed their tactics in the second week to be far more positive. They then received accolades from CAN for their second week negotiating approach. Other joint fossils were awarded to: Australia and New Zealand and Saudi Arabia and Poland.

CAN held a side event, attended by 70 people, to explain our vision on a work plan to ensure a FAB deal is delivered in 2015. Among them were delegates from: Slovakia, Korea, Lebanon, Ecuador, South Africa, Thailand, Botswana, a UN officer from Geneva, business NGOs and non-CAN civil society organizations and others.

CAN gave presentations at all four of the workshops held as an official part of the negotiations and delivered 10 interventions.

Bangkok

At this second intersessional preceding COP18 in Doha, CAN focused on avoiding a catastrophe in Doha. All of the KP and LCA negotiations were coming to a close at the end of 2012 and a new workplan with little to nothing had been planned. CAN was able to work effectively by producing its daily ECO and delivering interventions. Although time was limited and so only five interventions were delivered.

Doha

At COP18 in Doha, Qatar, CAN's presence was prolific around the negotiations, where CAN pushed for the most fair and equitable outcome possible. With the closing of the first Kyoto Protocol period and the LCA, CAN advocated for a second commitment period, successful closure and transfer of all things LCA, and an ADP workplan to help result in 2015 legally binding agreement. Several highlights that the CAN Secretariat led, included:

- + Hosting two in-person strategy sessions to prepare and strategize through the Doha negotiations. The sessions focused on political stocktaking and intelligence sharing, joint strategy development through the negotiations and beyond, and pursuing a collective lobbying strategy.
- + Fifteen CAN Interventions were delivered, nine of which were given by CAN members from the south. CAN was able to give all seven opening plenary interventions, six snap interventions and two closing plenary interventions.
- + CAN participated in the special ADP session held to facilitate observer organizations to provide their input, making more interventions than any other civil society organization.
- + CAN coordinated and participated in over 20 bilateral meetings including the Qatari Presidency, Christiana Figueres, IPCC, FAO, as well as country groups such as LDCs, AOSIS, Africa Group, US, Canada, Australia and the EU.

GOVERNMENT MEETINGS

CAN continued its relationship and support of key vulnerable country groupings. CAN met with the Least Developed Countries, the Africa Group and the Association of Small Island States and provided them with advice and support on an ongoing basis throughout the year. CAN participated in the handover ceremony from Pa Ousman Jarju, the outgoing LDC Chair, to Prakash Mathema, the incoming LDC Chair. CAN looks forward to continuing support for the LDCs under the new Chair. CAN members have identified supporting these vulnerable country groupings as a key objective.

As is usual, CAN met a broad range of other country groupings including: the Cartagena Dialogue, the European Union, and the Umbrella Group as well as dozens of country delegations, including regular meetings with major developing countries like China and India.

For COP18, CAN worked with IndyACT, its member in the region, as well as the Global Campaign for Climate Action (GCCA), to develop a strategy that aimed to achieve the best possible outcome of COP18: making a shift in the way the region works on climate change and pushing Qatar to become more progressive. This involved strengthening the climate movement in the region to stay active beyond COP18, working with high-level individuals to have CAN's message heard by the ruling family and mobilizing Arab and

Great opportunities to meet hundreds of colleagues around the world who have totally different backgrounds but share the common cause of fighting against climate change. This is sometimes utterly frustrating(!), but the diversity needs to exist for real change to happen."

Naoyuki Yamagishi
WWF, Japan

Civil Society flag at the climate negotiations
Photo Credit: Naoyuki Yamagishi

global civil society into requesting “Qatar to lead” in the region. The outcomes of this work where that Qatar interacted with civil society and CAN advised the Presidency daily on how to achieve a strong COP18 outcome. Qatar also pushed the countries of the Gulf region to commit to climate action and along with Saudi Arabia, UAE and Bahrain, pledged to submit emissions reduction targets in 2013. This is a complete new rhetoric that was welcomed by Arab civil society.

Additionally, the Arab Youth Climate Movement (AYCM) was established in November. This new movement was very active and inspiring at COP18.

LIAISING WITH THE UNFCCC

The CAN Secretariat serves as the focal point for the Environmental Non-Governmental Organization (ENGO) constituency at the UN climate talks. In this role, CAN works to ensure adequate CAN and general civil society participation at negotiations, in line with UN principles of civil society inclusion. CAN continued in this capacity in 2012 by engaging with the UNFCCC Secretariat to ensure CAN views were heard and members had acceptable access to negotiations.

As in past years, CAN worked to coordinate its members to ensure CAN and civil society representation in various expert meetings of the UNFCCC negotiations. These extraordinary meetings convened by the UNFCCC covered a range of topics from climate financing to adaptation programs in developing countries to technology transfer mechanisms.

NEGOCIATIONS SUR LE CLIMAT MARRAKECH OCT-NOV 2009

ECHO
ÉDITION FRANÇAISE

ECHO est publié par les Organisations Non Gouvernementales lors des conférences majeures depuis la Conférence de Stockholm en 1972. Cet exemplaire est produit de façon collective par les groupes du Réseau Action Climat mondial présents à COP7.

Une Ombre de plus

Aujourd'hui au petit matin, le Japon, la Russie, le Canada et l'Australie ont fait tout leur possible pour couler l'Accord de Marrakech. Jeudi de l'accord de Bonn à COP7, le Président a mis sur la table des négociateurs un compromis. Mais ce paquet a été refusé par le Gang des Quatre - Japon, Russie, Canada et Australie.

Et rejetant l'arrangement du Président, ces quatre pays empêchent le reste du monde de s'entendre et de permettre la clôture de l'accord de Bonn. Sachant que ce paquet honorait Bonn et représentait un compromis entre toutes les Parties, il est difficile de comprendre ce que cherchent ces quatre pays. Le paquet incluait bon nombre de « points chauds » qui devaient former la base sous-jacente à l'accord.

Mais le Gang des Quatre n'étaient pas décidés à faire de compromis, choisissant au contraire de pousser à leur limite les discussions, risquant ici de faire échouer les négociations. Que pensent-ils encore obtenu avec leurs tactiques de voyous ? Après avoir reçu des puits en quantité plus que généreuse, un plus d'air chaud qu'ils ne pouvaient en espérer. Il est temps d'arrêter cette manigance. Je vous en prie, voyez la volonté des autres d'avancer et voyez les dommages que vous infligez à la cause du multilatéralisme. Concluez cet accord AUJOURD'HUI !

September Issue

CAN is an alliance of like-minded NGOs working on climate change issues. Through vigorous mobilization and information sharing, CAN delivers a powerful voice from the civil society and joint-handedly tries to solve climate change across the globe. Working with CAN means a true utilization of its worldwide network and membership, an essential asset in dealing with climate change that frequently requires a combination of domestic and international perspectives.”

REGIONAL COORDINATORS MEETING

The secretariats and coordinators from regional and national nodes met to discuss the future of the Network at what would be their inaugural Secretariat & Coordinators Annual Meeting (SCAM) in Colombo, Sri Lanka. The meeting was the first of its kind in many years.

In the past, coordination between CAN nodes has been minimal so there is untapped potential to improve this situation. A higher level of coordination could increase CAN's impact on climate policy, but this requires strengthening lines of communication, developing cohesive plans, building synergies and sharing best practices.

To increase the effectiveness of CAN at a regional and national level, those present agreed to work towards global harmonization across the Network on several levels, including: strategy, governance, management and administration. These meetings will take place annually and SCAM2 is scheduled for May 2013 in Uganda.

EMPOWERING VOICES FROM THE GLOBAL SOUTH

PRE-COP WORKSHOP ON CLIMATE ADVOCACY

CAN International and the Southern Voice Program organized a joint three-day Pre-COP workshop on Advocacy for the Southern-based networks working on climate change from 21–23 November 2012 in Doha, Qatar.

Forty-five participants from the global South attended the workshop. The three-day workshop was divided into two parts: discussion of national and regional level advocacy experiences and case study presentations; and concentration on international-level advocacy and influencing UNFCCC processes. Additionally, strategizing on the future course of actions and planning for the second phase of the Southern Voices Program took place at the end of the workshop.

The workshop was a very fruitful gathering. Case studies were shared among the participants, which helped them to learn from each others' successes and challenges. Many participants found the techniques of being an expert presenter in their issue-area and also a participant motivating. Interesting success stories, challenges and learning of advocacy initiatives were shared and discussed.

At the end of the workshop, many participants suggested that such programs of cross learning should be continued, as it helped participants understand through real-life examples of colleagues, rather than theoretical lectures. Some networks also sat together to design cross learning programs amongst themselves. Developing a climate change advocacy tool was also discussed at the training.

SOUTHERN VOICES PROGRAM

CAN is a member of the Climate Capacity Consortium, which is led by CARE Denmark. The objective of this consortium is to help ensure that the needs, rights and perspectives of civil society organizations and people vulnerable to climate change are adequately advocated for and reflected in a fair, ambitious and binding climate agreement for the period after 2012. This agreement must be adopted by the international community, as well as in the development and implementation of climate change policies at national, regional and international levels. CAN worked with regional networks in South Asia and West Africa to increase their institutional and advocacy capacity, as well as raise general public awareness of climate change policies and programs in their regions. The second phase of this program is underway for 2013, where two additional networks, Latin America and the Pacific, will join.

CAN and the Climate Capacity Consortium organized a joint side event during the COP 18. The topic of the event was "Climate Action and Advocacy in the South: civil society activist share achievements and challenges." Over 90 participants attended to

share the experiences and challenges of southern-based climate networks on national and regional advocacy initiatives. Speakers from Kiribati, Indonesia, Niger, Malawi and Nicaragua presented case studies. Presentations were followed by discussions while some participants from the floor also got the opportunity to share their experiences and learning. The event turned out to be successful forum to share the advocacy actions taken by networks in the global South. After the event, many non-CAN member organizations in the room approached the CAN Secretariat with the desire to join CAN.

LEADERSHIP DEVELOPMENT PROGRAM (LDP)

CAN International recruited eight Leadership Development (LDP) Fellows to attend COP18. This program builds skills of the participants through training, mentoring and other capacity building activities, to allow them to be leading climate change activists. Fellows represented eight different regions in the global South: Cote D'Ivoire, Tanzania, Sri Lanka, Kiribati, Indonesia, Argentina, Lebanon and Ukraine.

At the COP, the Fellows attended all daily meetings and engaged with CAN's thematic working groups. During this time, the Fellows helped organize and attend government meetings with their regional delegations and with governments leading negotiations on their thematic issue. Fellows also made interventions in the plenary on behalf of CAN.

LDP Fellows also actively participated in the Pre-COP workshop and CAN strategy sessions. Fellows will attend the UNFCCC sessions in 2013, as well as developing and implementing annual plans in close coordination with their respective regional coordinators in order to build their leadership and regional capacity.

Capacity building sessions were organized daily to help LDP Fellows and other CAN members better understand and engage in the UNFCCC negotiation process and specific hot topics in the negotiations. These sessions were attended between 15–40 people each day and were viewed as one of the most valuable services CAN provided at the negotiations for members.

INDEPENDENT AUDITOR'S REPORT

Excerpt from Auditor's report

To the Board of Directors of Climate Action Network - International

We have audited the accompanying financial statements of Climate Action Network - International, which comprise the statements of financial position as at December 31, 2012, December 31, 2011 and January 1, 2011, and the statements of operations and changes in net assets and cash flows for the years ended December 31, 2012 and December 31, 2011, and a summary of significant accounting policies and other explanatory information.

...In our opinion, the financial statements present fairly, in all material respects, the financial position of Climate Action Network - International as at December 31, 2012, December 31, 2011 and January 1, 2011, and the results of its operations and its cash flows for the years ended December 31, 2012 and December 31, 2011 in accordance with Canadian accounting standards for not-for-profit organizations.

The Climate Action Network (CAN) is a worldwide network of over 850 Non-Governmental Organizations (NGOs) in more than 90 countries, working to promote government and individual action to limit human-induced climate change to ecologically sustainable levels.

CAN members work to achieve this goal through information exchange and the coordinated development of NGO strategy on international, regional, and national climate issues. CAN has regional network hubs that coordinate these efforts around the world.

CAN members place a high priority on both a healthy environment and development that “meets the needs of the present without compromising the ability of future generations to meet their own needs” (Brundtland Commission). CAN’s vision is to protect the atmosphere while allowing for sustainable and equitable development worldwide.
