

Climate Action Network

SBI 45 Closing Intervention

Thank you. My name is Luisa Daniela Marin Platero and I am speaking on behalf of Climate Action Network.

CAN considers the public registry of NDCs as crucial infrastructure in the Paris Agreement and it should be designed to be useful for raising ambition. In that sense, we welcome the suggestion to add a function to track history of changes to NDCs in the registry. We expect Parties to overcome the scope issue as soon as possible to have substantive discussion on this.

The CDM review still needs to address serious issues social and environmental integrity issues, to set a precedent for what needs to be improved on in the SDM.

We welcome the SBI's draft decision on NAPs, in particular the progress made on enabling GCF funding for countries to develop their NAPs. Following positive discussions on capacity building this week, the Paris Committee on Capacity Building must now prioritise supporting developing countries to develop NAPs.

The risks from climate change have never been greater. As developing countries have consistently highlighted, action on L&D needs to move from rhetoric to action and support. CAN supports a pre-session workshop to discuss activities for the 5-year workplan of the WIM, including on finance.

Thank you.
