

Climate Action Network

SBSTA 45 Closing Intervention

Thank you. My name is Eddy Perez and I am speaking on behalf of Climate Action Network.

CAN welcomes progress made this week on the technology framework, and welcomes the opportunity to submit views on its principles and structure before SBSTA's next meeting in May 2017.

However, we are disheartened by the lack of progress on modalities for accounting of finance. While the definition of modalities should align with APA's work on transparency, a clear workplan is still needed to clarify how and when these modalities will be developed in order to ensure an accurate estimation of financial flows and the credibility of provided and mobilised finance in the context of the Paris Agreement. Furthermore, we are truly disappointed that the workshop proposed for SB46 was eventually deleted from the draft conclusion, thus limiting inputs and participation into the process.

In addition, despite the Paris Agreement's recognition of the importance of safeguarding food security and ending hunger, the critical need for support for adaptation in agriculture, and the significant contribution of the sector to global greenhouse gas emissions, the agriculture negotiations resulted in no substantive outcome. Work has been further delayed until next year. We look to Parties to double down on negotiations at SBSTA 46 and establish a work programme on agriculture and food security to advance action and support and protect farmers' rights.

Thank you.
