

22nd November 2024

To the United States, European Union, UK, Canada, Japan and other developed countries at COP29 in Baku:

We, the collective constituencies and organisations formally representing civil society present in Baku, and with broader global civil society and millions of members behind us, are deeply outraged in your destructive role in creating an absolutely unacceptable NCQG draft negotiating text on this final day of COP29.

We are not fooled: we understand that you will interpret this text as a complete exit from any legal obligations to provide climate finance for developing countries, as agreed in the UN Climate Convention and the Paris Agreement.

You are blocking progress in Baku due to your demands that developing countries do more to reduce emissions while failing to deliver the finance and technology that are needed to reduce emissions, adapt to the impacts of climate change, meet the costs of Loss and Damage and a just and equitable transition to greener and fairer societies.

You claim to champion a rules-based system, yet flout the rules when they don't suit your interests, putting at risk billions of people and life on earth.

We will not allow you to run away from your legal responsibilities but instead urge you to take the lead in transitioning from fossil fuels and providing public funding and technology to developing countries.

You are required to fulfill your commitments under the Paris Agreement, and Climate Convention and we demand you deliver them fully here in Baku. If this COP ends with a weak or nonexistent outcome, you will be the ones to blame. And we will hold you responsible both here and when we go home.

Signed-
